# Punkers Say

## Never let them take you alive!

They walk down the halls every day with the same reactions following them. Teachers and students alike turn and shake their heads as they mumble words like "skater," "punk," or "freak."

Since the beginning of society there have been those who follow the masses, and those who choose to set themselves apart. The middle class belief in conformity has led to needless persecution of those who choose to defy the roles society has cast for them. Since people fear what they do not understand, "punks" face the greatest misunderstanding.

The closest comparison that may be drawn is that of the counter-culture that developed during the sixties. Long hair and strange clothes were

the mark of Communists and draft-dodgers. Today's counter culture is deemed, all too often nothing more than hateful or destructive.

This culture goes far beyond strange clothes and haircuts. "It's not

**"... it is a state of mind, you either understand it or you don't, you have to look at it as a way of life."**

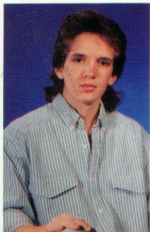

a fashion or a fad. The only way to describe it is a state of mind, you either understand it or you don't, you have to look at it as a way of life," commented junior **Jennifer Albright**.

It's not something that everyone can do. It takes a very strong desire to be an individual and the ability to cope with rejection and ridicule from the rest of society.

Unlike fads and fashions, there are no set patterns of attitude or dress. Each individual's personality sets these standards; therefore, this culture is constantly changing which is perhaps what keeps it flourishing instead of dying out. It cannot be denied; however, that the number of these "punks" is increasing as more choose to cast off the chains placed upon them and to adopt the popular slogan "Never let them take you alive!"

# Traditions

## II Mole Olympiad

A tradition is the handing down of customs, rituals and beliefs from generation to generation. The first major tradition of the year is Homecoming and the events during Spirit Week. A

new fall tradition is the celebration of Mole Day. It is in recognition of the chemical mole (a mole is 22.4 liters of a gas at STP or  $6.02 \times 10^{23}$  molecules).

Some of the LHS winter rituals include decorating the SGA Christmas tree, winter spirit week which marks the beginning of Basketball City Tournament, the selling of carnations for Valentine's Day, and the King of

Hearts dance with an all-male court.

The spring months bring not only the annual Almost Anything Goes assembly, but also many traditions which are primarily for the graduating

seniors. Prom, the Golden Laurels banquet for National Honor Society members, the Senior Dinner Dance, Recognition Assembly which in-

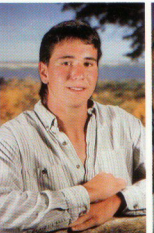

cludes the dedication and presentation of the yearbook and last, but not least, that long awaited day — Graduation!!! Eventually every school year comes to an end, but many of the LHS traditions have existed more than fifty years.

# Any Which Way You Can

## How am I getting to school today?

Students at Lanphier High School have many different ways of getting to school. Some are more enjoyable or even "cooler" than others, but they all achieve the same result.

By far the coolest way to get to school is to drive yourself. Many seniors take advantage of this privilege. Having one's own car is not a necessity, it is possible to rogue off parents by using the family car. Senior **Renaë Petropoulos** stated, "I drive to school, but I'd rather be chauffeured." Unfortunately there are some disadvantages to driving which must be taken into consideration. Besides buying gas, there are also insur-

ance premiums and general maintenance costs. Not to mention the task of scraping off those darn windows on freezing cold mornings, but most students agree that the freedom of driv-

... riding a bike, walking  
or busting out the skate-  
board ...

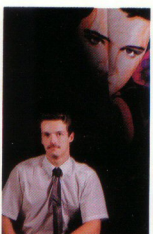

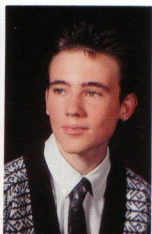

ing oneself far out weighs the disadvantages.

Another method of getting to school is to hitch a ride with a friend who drives. One great advantage to this is that it is usually free! The major

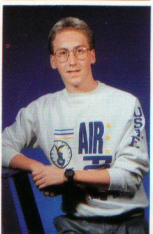

draw back to getting a ride, though the diminishment of freedom.

An alternative to driving or getting a ride is to ride the "dreaded" school bus. Getting up in the wee hours of the morning and suffering through a minute, bumpy ride is not the most popular way to get to school. Many of the underclassmen are forced to go through this ritual everyday.

Some students are fortunate enough to live close to school, riding a bike, walking or busting out the skateboard are some of their methods of getting to school. As one can see, getting to school can be an adventure in itself.

# Locker Sweet Locker

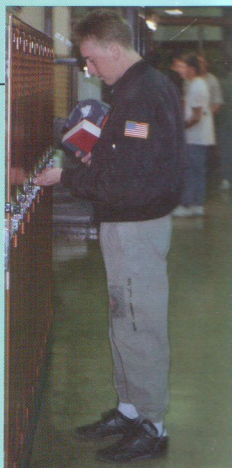

It's my home away from home.

They say that as one gets older, everything changes. Well, that holds pretty much true — even for lockers. Lockers are a little like an extension of one's home, and the variety of items to be found in them is amazing. In a recent survey, the following articles were found in the lockers of LHS: toys from Happy Meals, a candy dish, pen/pencil containers, a garland of soda can tabs, notes, notes, and more notes (the only way to keep Mom from reading them), and even seasonal decorations.

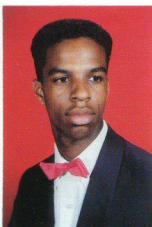

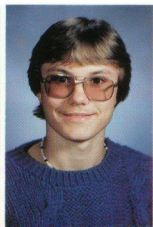

The differences between senior

lockers and freshmen lockers are vast. Perhaps the greatest difference is in the decor. The freshmen locker, if it is decorated at all, usually has a rock star poster, and maybe a sticker or two from a favorite radio station. On the other hand, the senior locker is much more worldly-wise. It traditionally has snapshots of friends (male and female), sophisticated posters or pictures of actresses and actors, maybe a mirror (to keep up the good image, of course), and a big calendar to mark off the days until graduation.

# First Date Frenzy

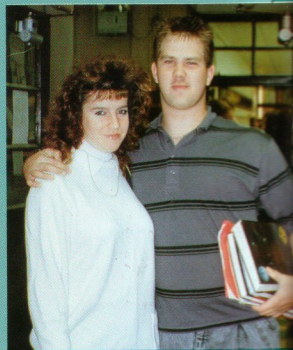

## What if I say something stupid?

"I was so afraid it took me three days to get my nerve up to ask her out." Does that sound familiar? "I started getting ready at 5:30, and my date wasn't supposed to arrive until 7:30," exclaimed an anonymous senior. Do you remember your very first date? No parents there to break the ice, just you and your date. You were probably excited, anxious and scared all at the same time. Talking to the opposite sex is so easy when there are friends around for moral support, but a date means you'll probably be with him/her alone!

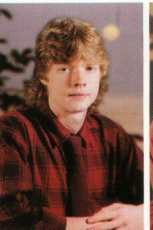

**"I didn't know what to expect. It was very unusual. We went to a movie and had a very good time."**

Most Lanphier seniors started dating at the ages of 15 or 16, but a few began at 14. The majority surveyed described their first date as being all right, a success rather than a disaster. Senior **Anna Hayes** remarked, "I didn't know what to expect. It was very unusual. We went to a movie and had a very good time. I'm not dating him anymore, but we're still friends."

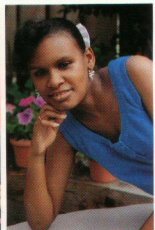

Whether they had feelings of excitement, nervousness or anxiety, seniors agreed though, that those first date jitters will always be remembered.

# Decisions, Decisions

## Where do I go from here?

From the first day of senior year until the last, there are many decisions which have to be made, but the most difficult is probably, "What do I do after high school?" Possibilities after graduation include getting a job, continuing one's education or enlisting in the armed services. Senior **Heather Williams** divulged, "I am going to the University of Illinois and major in Ceramic Engineering."

Consequently, high school commencement is not so much an end as it is a beginning. The beginning of life in the "real world." The challenges faced during high school years are meant as preparation for the challenges one must face out in the "real world."

For some seniors, the end of high

school day can be a moment of great jubilation and ecstasy. For the college-bound, it often produces anxiety and fear because of the decisions which have to be made. Which col-

... high school commencement is not so much an end as it is the beginning of life in the "real world."

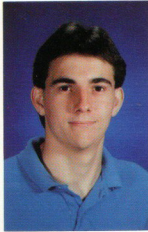

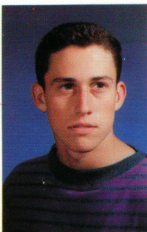

lege to attend, how to get scholarships and financial aid, whether to live on campus or off, and most importantly what major to choose. Seniors also worry if they can handle the responsibilities of college life such as sticking to a budget, holding a part-time job,

and finding time to study and still have a social life.

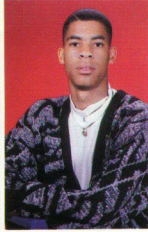

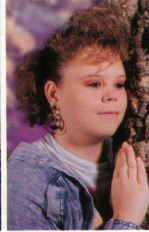

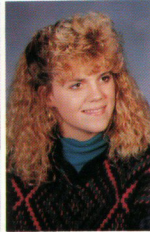

For those going out into the working world, the worries are equally great. Where to live - at home or in an apartment, where to find a self-supporting job, how to pay for a car, insurance and gas and still have money for a social life.

The transition from high school to college or the world of work is frightening as well as challenging, but it's one most seniors have been preparing for for many years.

Four years provide a wealth of memories — some good and some bad. Whatever the feelings are, high school memories can never be replaced.

## A successful end to a great week.

Homecoming 1989 was as successful as past Homecomings. The day started with the annual parade from the fairgrounds to Memorial Field.

All the school spirit, pride, and enthusiasm of the morning's parade carried into the football game later in the day. Though battered and injured, the mighty Lions fought a courageous battle only to get beaten. The halftime show put on by the Cheerleaders, Pom-poms, and the marching Band helped to keep spirits high. Another

happening was the presentation of the Homecoming Court. All in all, the afternoon's festivities contributed greatly to the success of Homecoming '89.

As the end of the day grew near, the anticipation went to the dance. It was highlighted by the presentation of the Homecoming Court and Queen. The theme song of the dance was "When I See You Smile," by Bad English. As the band played, the evening and Homecoming '89 became a fond memory for everyone in attendance.
